Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Response to Amendment

1. This Office action is in response to the amendment filed 09/18/2007.
2. Applicant's arguments, with respect to the new issues of claims 1 and 6, necessitated the new ground(s) of rejection presented in this Office action.

Quotations of U.S. Code Title 35

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. The claims and only the claims form the metes and bounds of the invention. "Office personnel are to give claims their broadest reasonable interpretation in light of the supporting disclosure. In re Morris, 127 F.3d 1048, 1054-55, 44 USPQ2d 1023, 1027-28 (Fed. Cir 1997). Limitations appearing in the specification but not recited in the claim are not read into the claim. In re Prater, 415 F.2d 1393, 1404-05, 162 USPQ541, 550-551 (CCPA 1969)" (MPEP p2100-8, c 2, I 45-48; p 2100-9, c 1, I 1-4). The Examiner has full latitude to interpret each claim in the broadest reasonable sense. The Examiner will reference prior art using terminology familiar to one of ordinary skill in the art. Such an approach is broad in concept and can be either explicit or implicit in meaning.

Claim Rejections - 35 USC § 102

5. Claims 1-9 are rejected under 35 U.S.C. 102(e) as being anticipated by U.S. Patent No. 6,564,108 ("Makar").

Regarding claims 1 and 6, Makar teaches a method and system for controlling an ambient light, the method comprising: receiving main program data and additional data by a receiver (see C 7 L 10-31 and C 11 L 14-18); setting a property of the ambient light based upon the additional data (see C 7 L 33-41); including descriptive information about the main program data in the additional data (C 11 L 12-28); filtering the descriptive information from the additional data (see C 11 L 29-35); and setting the property of the ambient light based upon the descriptive information to enhance perception of the main program data (see C 11 L 37-40).

Regarding claims 2 and 7, Makar teaches presenting the main program data by a presentation device and setting the property of the ambient light that is in proximity of the presentation device (see C 6 L 63 to C 7 L 8).

Regarding claims 3 and 8, Makar teaches wherein setting the property of the ambient light is substantially synchronously with presenting the main program data by the presentation device (see C 7 L 10-15).

Regarding claim 4, Makar teaches wherein setting the property of the ambient light is configurable (see C 9 L 22-35).

Regarding claim 5, Makar teaches wherein setting the property of the ambient light is configurable by a user preference (see C 9 L 22-35).

Regarding claim 9, Makar teaches the lighting unit comprising a light armature (see C 7 L 32-40).

Response to Arguments

6. Applicant's arguments with respect to claims 1-9 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
